Phone: (517) 371-3407

Fax: (517) 371-1366

Dear Patient:

Now that you are part of my practice, I feel it is important that you receive your orthopaedic care concerning this injury solely through this office. The emergency rooms and the various urgent and/or Redi-Care walk-in facilities are not designed, nor equipped to provide comprehensive orthopaedic care, nor can they coordinate care through this office. This is, if you are receiving care from us, you cannot also receive care for the same problem through the emergency room.

I am available 24 hours a day, so if a situation should arise that you think demands urgent care, please contact this office. There are occasions, however, when I am in surgery or otherwise occupied and may not be able to get back with you immediately. If you feel that your need is urgent, please call a 2nd and 3rd time. If after several attempts you are unable to reach the office or the orthopaedic surgeon on call, then you may proceed to the emergency room. When you arrive, please notify the staff that you are currently under my care and to contact my office at, (517) 371-3407, option 1.

All lab testing and studies such as: MRI, CT, bone scans, and blood work, require follow-up appointments. Please be sure to schedule these follow-up appointments as soon as possible.

I, _____, authorize the practice to provide medical care for my current condition and have been made aware of the above policy.
